

Finishes

MFC (melamine) and our hand-selected, crown cut veneers are both very durable finishes. Veneers are a more costly raw material than MFC and require a lengthy and skilled series of preparation and finishing processes – and therefore carry a price premium.

MFC Finishes

- Wood grain MFC offers a realistic likeness of natural timber at an attractive cost.
- MFC provides consistency of colour and structure and a perfect colour match between panels.

Veneer Finishes

- Bring greater individuality and warmth to each item of furniture.
- The beauty of the natural variations in hue, grain and figure make each piece unique.

High Gloss Lacquer Finishes

- Create a contemporary look either alone or in combination with veneer.
