

# STANDIVARIUS

## Piano sleek keyboard

This USB keyboard is favoured by laptop users because the highly responsive scissor-action keys feel like a laptop keyboard and its compact size makes it easy to slip into a laptop bag.

By embedding the numeric keys in the 86 key layout the keyboard width is reduced, which means you can save space and use your mouse closer to your body which improves working posture.

Piano features a UK 86 key layout including internet, email, and audio functions with LED indicators for Fn, caps & power.

A Standivarius laptop stand can be combined with this compact USB keyboard an ergonomic workstation can be set-up anywhere to improve user comfort and meet Health & Safety DSE requirements for laptop users.
