

Care instructions Aeris Muvman

Microfibre cover:

- Optimum care is ensured by using water and pH neutral soapsuds. Stains containing oil and fat should be treated beforehand with ethyl alcohol.
- After each cleaning action you should rinse with clear water. Never use chlorinated detergents.
- The seat must only be treated damp, not wet, otherwise the materials used under the fabric may be damaged. Therefore, please use only a little bit of water and apply only small amounts of the cleaning detergents.
- To avoid edges, please always treat from the edge to the middle.

Wool blend cover

- Gently vacuum the cover regularly with a soft vacuum nozzle.
- Always remove stains as quickly as possible.
- Most types of stains are easily removed with lukewarm water, possibly with the addition of a pH-neutral cleaning detergent. Always use a white, clean cotton cloth.
- Please press a dry kitchen towel or colourless kitchen paper against the fabric to absorb moisture and dirt.

Artificial leather cover:

- Please clean the seat only with lukewarm water and some soapy water with a soft, lint-free cloth or a soft brush.
- Alcohol-based disinfectants can be used.
- **Attention:** Never use harsh detergents based on chlorine, lye, acid, hydrogen peroxide or abrasives.

Cleaning of the column:

- The powder-coated column is best cleaned with a soft cloth and a gentle detergent or benzine.
- **Attention:** Never clean the extendable part of the gas spring!

Cleaning of the foot plate:

Abrasion marks left from soles of shoes are best removed with a soft eraser or a soft cloth with benzine.
